

# Homemade Crystals

Complete the three steps to earn your Kitchen Chemistry [patch](#).

1. **Gather your materials:** You will need the following items:

- Glass jar or cup
- Stick (wooden dowel or popsicle stick)
- Borax
- Spoon
- Hot water
- Pipe cleaners

You can make crystals with other different materials. Check out this [link](#) for more ways to grow crystals.

2. **Grow your crystals:** Watch the attached video to learn how to make your own crystals.

3. **Display your crystals:** Show off your crystals to your family. Display yours in the window or even make it an ornament.
