App Problems

Problem 2: Teyana

Teyana has only a few weeks until summer and lots to do! She's a 15 year old Girl Scout who is getting ready to bridge to Ambassador. She has to find time to study for end-of-year tests. She's involved in different school activities. And she loves spending time with her family. She needs your help to create an app that will help her to balance her school work with time with her friends and family.

Teyana's favorite color is turquoise. She loves to take photos and wants to remember the end-of-year events. She wants an app that can include her schedule and list of things to do before summer break.

Problem 3: Morgan

Morgan was just given the role of manager of her school's girls' basketball team, the Wildcats! She needs your help to create an app that will help her with her new position. She has lots of tasks to manage, from making sure players are at practice and games to collecting Laundry every Friday.

The Wildcat's mascot is a tiger. The team gets along really well. They want to be able to talk and plan for practices and games, even when they're not at practice. The team wants to be able to share with everyone when they won't be able to go to practice or games.
