

Campfire Safety Rules

- Whenever you build a fire, make sure the area is clear of overhanging branches, steep slopes, rotted stumps or logs, dry grass and leaves, and cleared of anything that could burn, like litter or pine needles.
- Watch for flying sparks! Tell an adult if you see any, and have them help you put them out right away.
- Make sure you have a bucket of water or sand nearby before you light your fire.
- Don't wear anything nylon or plastic, like a poncho, near an open flame.
- Remove any scarves or loose clothing.
- Tie back long hair before starting a fire.
