

CAMPSITE CHECKLIST

Is the area for your campsite flat and dry?

Were the sticks and stones cleared away?

Did you set up a separate area for cooking, hand washing and dishwashing?

For your cooking area:

Can animals get at your food?

Are your coolers stashed in animal-proof containers?

Are there two trees nearby where you can tie a rope between them to hang things?

For your sleeping area:

Are the tents spread out so there isn't too much traffic in one area?

Are the openings to your tents facing each other?

For your fire building area:

Are you using a fire ring that is already at the campsite?

What kind of sticks are you using to build your fire?

Are there any trees or plants near your fire ring?

What size fire will you make?

How will you extinguish your fire?
