

Automotive Manufacturing 2

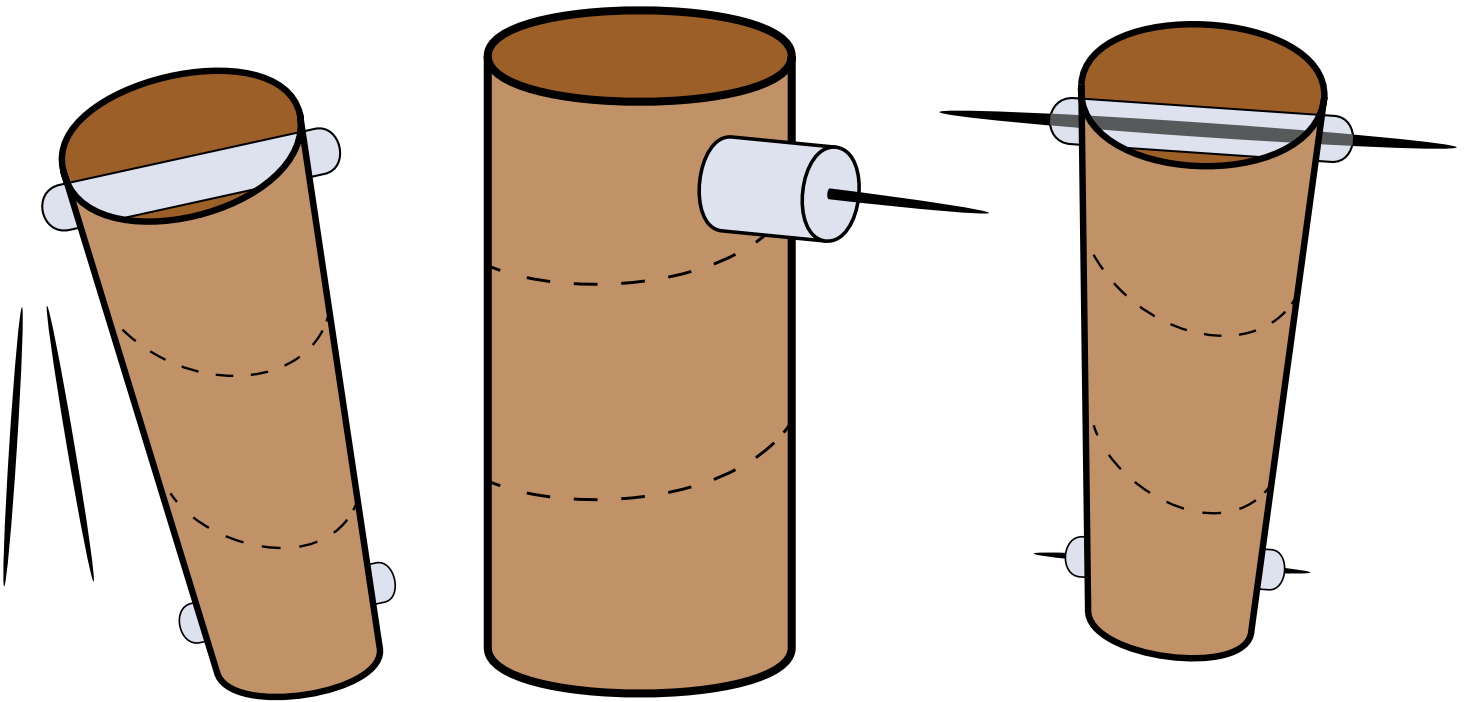

How To Assemble A Vehicle

Step 1: Put the axle brackets into the vehicle body.

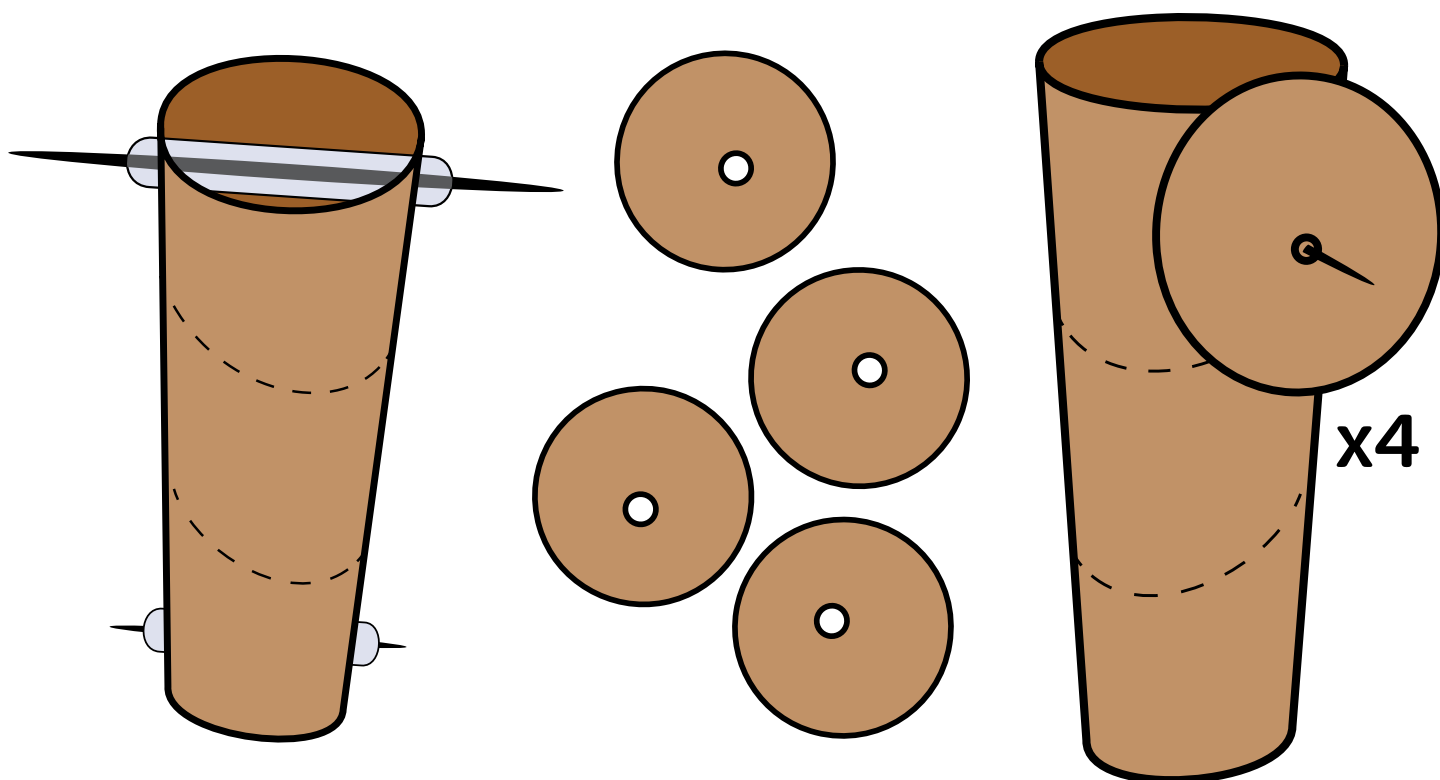

Slide the straws through the holes in the toilet paper tubes.

Step 2: Put the axles through the brackets.

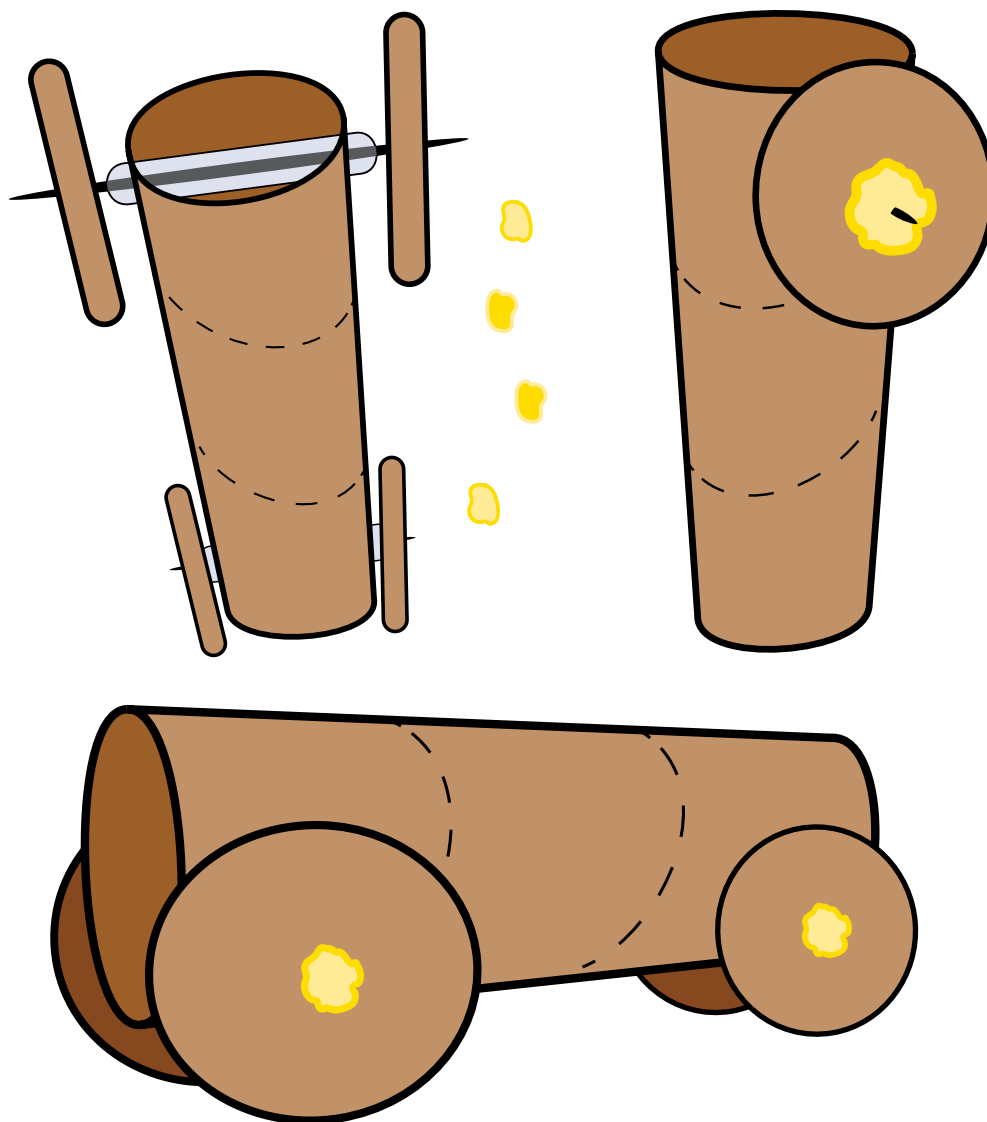

Slide the toothpicks into the straws.

Step 3: Put the wheels on the axles.

Put the 4 wheels on the ends of the toothpicks. If using plastic bottle tops, put them on with the hollow part facing out.

Step 4: Put sponge on the axles.

Put a piece of sponge on the end of each toothpick to hold the wheel on the axle.
