

App Development 2

Interview Data Object

Create a data object about the female leader you interviewed.

First, review your data to determine properties for the object. For example, you might create one for each interview question. Then, add in the values for each property.

{

Property	Value
firstName :	,
lastName :	,
leadershipRole :	,
:	,
:	,
:	,
:	,
:	,
:	,
:	,
:	,
:	,
:	,
